See work clearly

The user-friendly story map transforms the flat backlog into a meaningful picture of work, making backlog refinement and sprint and version planning easier.

Build collaboration

Celebrate wins and share learnings with team retrospective boards for scrum and kanban, so you're always learning and improving.

Gain customer focus

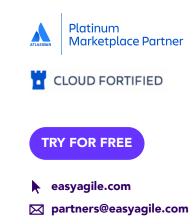

Highlight what your customers need from you, and deliver products they love to use when you prioritize work by customer value with user story mapping.

Customers already using TeamRhythm

Ø	Filters support focused sprint planning
\oslash	Team goals, commitment and progress seen at a glance
\oslash	Story map hierarchy provides context for backlog refinement
Ø	Retrospective boards for team collaboration
\oslash	Tight Jira integration avoids duplication

* * * * 4/4

"This very useful tool, has helped me and the team to work together very efficiently. Visualizing all of our stories from our different projects in one place helps us track and plan our sprints. Love the drag and drop features that make life so much easier. Personally, highly recommend this for any team!"

ELIZABETH JACOB, World Vision Canada

"Great tool to help lift the discussion about priority to a higher level. Really good interface and fast integration.

MATHIAS WULFF, Cluey Learning
