TeamRhythm

Programs

Personas

Intuitive solutions that seamlessly integrate with Jira to help agile teams plan and deliver their best work.

* * * * 4/4

"Because we use Atlassian Jira and Easy Agile is built on that, it was natural to our ecosystem and easy to roll it out. It was super easy to onboard ourselves because it was incredibly intuitive. You just add the plug-in and it works."

JOHN WALPOLE, Lyft. Reviewing Easy Agile TeamRhythm

* * * * 4/4

"Easy Agile Programs was our preferred option because of its ease of use and its fully integrated capabilities within our Jira application, making our agile teams much more effective during PI Planning and efficient during execution phase."

AMANDA LATUSZEK, AF Group. Reviewing Easy Agile Programs

"I am impressed with this very useful tool, that helps me and the team to work together very efficiently. Visualizing all of our stories from our different projects in one place has helped us track and plan our sprints well. This has also increased our team productivity and collaboration significantly. Love the drag and drop features that make life so much easier. Personally, highly recommend this for any team!"

ELIZABETH JACOB, World Vision Canada

* * * * 4/4

"Great tool to help lift the discussion about priority to a higher level. Really good interface and fast integration. Seems like this should be a default part of Jira but on the other hand: then it would probably not get as much love and attention to detail as the Easy Agile crew are providing."

MATHIAS WULFF, Cluey Learning

TeamRhythm will help you and your team stay agile in Jira. The user-friendly story map format provides the context that makes sprint planning and backlog refinement easy. Our retrospective features for scrum and kanban will help your team find their rhythm, so you're always getting better at what you do.

See work clearly

The user-friendly story map transforms the flat backlog into a meaningful picture of work, making backlog refinement and sprint and version planning easier.

Build collaboration

Celebrate wins and share

retrospective boards for

scrum and kanban, so

you're always learning

Gain customer focus

Highlight what your customers need from you, and deliver products they love to use when you prioritize work by customer value with user story mapping.

Easy Agile Programs

SCALED AGILE PARTNER PLATFORM

🛨 🛨 🛨 🛧 👍

"We didn't realize how powerful this tool was until we really dived in. Our company has been successfully using this for seven different ARTs now for over a year. Every team we convert from an old model of planning to using Easy Agile says they will never go back."

COLTON KOSICEK, CNA Insurance

🛨 🛨 🛨 🛧 🔺

"The Easy Agile Program app has made life easier for our POs, PMs, RTE, etc. It makes Jira easier to manage in a SAFe framework environment. Our PI Planning is easier to follow for all teams and we can identify the dependencies more efficiently within the train. As an RTE, I really like the tool and it makes my work simpler to synchronize with every team."

CHRISTOPHER GERVAIS, National Bank of Canada

Programs

Empower teams to deliver value at scale with a complete PI Planning solution seamlessly integrated with Jira. Maintain collaboration and alignment across teams and timezones throughout execution with a powerful but easy-to-use tool.

Easy PI Planning in Jira

Easily set objectives, and visualise committed features, dependencies, and milestones across multiple teams in Jira with a digitised SAFe[®] Program /ART Planning Board.

Align and unblock teams at scale

Identify blockers, reschedule work, and review progress at a 'team of teams' level. Visibility and flexibility enables teams to align with each other and to business outcomes.

Set teams up to deliver value

Minutes to set up with native Jira boards and issues. Schedule, create and estimate issues directly within Programs with no double-handling or manual work required before starting the sprint.

Easy Agile Roadmaps

Roadmaps

Roadmap Timeline

Drag and drop your Jira issues from the issues panel onto the timeline to show when the work will begin and end on that issue.

Fix Version & Date Markers

Visualize fix versions, marketing events and other external milestones on the roadmap to align business and engineering teams around product direction.

Theme/Team Swimlanes

Work with your team to group issues into highlevel streams of work that represent customer outcomes, or teams.

Communicate Customer Personas

Ensure team alignment around customer archetypes and desired functionality by capturing personas alongside the team agile board.

Easy Agile

Personas

Understand Customer Desires

Maintain a well refined backlog by detailing the persona and level of importance on each user story.

Order Backlog By Customer Value

Personas

Order the backlog by the level of importance a persona places on a given user story, so you deliver the most valuable functionality first.

* * * * 4/4

"Perfect for high level planning and communication of status to key stakeholders. Simple to set up, simple to manage, I'd really recommend this to others!"
